Career Objective

Motivated and accomplished Computer Science graduate, passionate about web development and dedicated to crafting user-friendly, responsive, and interactive websites. Eagerly seeking a challenging JavaScript/React Developer position to leverage my comprehensive technical skills, acquired through a master's in computer science and rigorous training in online bootcamps and Udemy courses. Over the past two years, post-master's degree completion, I have committed myself to continuous learning and hands-on application in web development. My solid foundation in computer science, coupled with specialized web development training, positions me as an ideal candidate for a Front-End Developer role. With nearly two years of experience as a technical support officer, I've honed critical thinking and problem-solving skills that complement my technical expertise.

Education

Master of Computer Science

July 2018- July 2020

Melbourne Institute of Technology, Melbourne

Professional Year

April 2022- May 2023

Performance Education, Melbourne City

Key Subjects: Australian Business Culture and Environment, Achieving Career Success, Australian Workplace Skills, and Professional Business Communication

Online Web Development Bootcamp/ Udemy Courses

Zero To Mastery Academy

Oct 2022- present

- Complete Web Developer Course
- Complete React Developer Course

JavaScript: The advanced Concept

Technical Skills:

- **Languages:** Proficient in HTML5, CSS3, SCSS, and advanced JavaScript.
- **Frameworks & Libraries:** Experience with CSS frameworks like Bootstrap, and a basic understanding of front-end libraries and frameworks such as React, TypeScript, Redux, and Firebase.
- **Responsive Design:** Skilled in creating responsive web designs using CSS frameworks, ensuring optimal user experiences across various devices.
- **Version Control:** Proficient in version control using Git and GitHub, ensuring efficient collaboration and code management.

- **Development Tools:** Familiarity with popular web development tools, including Visual Studio Code and Sublime Text, for streamlined and efficient coding.
- **Web Accessibility:** Knowledge of web accessibility best practices to create inclusive and user-friendly websites. Problem-Solving: Strong problem-solving and analytical skills, honed through practical experience and continuous learning in the field.
- **Attention to Detail:** Excellent attention to detail in coding, design, and project implementation, ensuring high-quality deliverables.
- **Eager to Learn:** Proven eagerness to learn and adapt, demonstrated by the completion of online bootcamps and Udemy courses, staying updated with the latest industry trends.

Projects

Personal Portfolio Website:

- Designed and developed a dynamic and responsive personal portfolio website using HTML, SCSS, and React to showcase my skills and accomplishments.
- Integrated Email.js API to enable seamless communication with website visitors. The API facilitates the sending of messages directly from the website, enhancing user engagement.
- Implemented a clean and modern design, focusing on user experience and accessibility.
- Utilized Netlify for effortless deployment and hosting, ensuring the website is readily accessible.

Haven Mart Shop

- Crafted a responsive online clothing store website using HTML, SCSS, and React, showcasing an eye-catching design.
- Implemented Firebase for robust and secure database management, ensuring optimal performance.
- Focused on user-centric design principles to enhance the overall shopping experience.

Maxflix

- This project is what I am currently working on. Designed and developed a dynamic and responsive streaming platform called Maxflix using React.js, replicating the core functionalities and user experience of Netflix.
- Integrated Firebase for efficient database management and Redux for state management, ensuring seamless data handling and optimal performance.
- Implemented a user-friendly interface allowing users to browse a vast collection of movies and TV shows, watch trailers, and view detailed information about each title.
- Utilized SCSS for styling the components and layout of the application, focusing on clean and modern design principles.
- Deployed the project on Netlify for easy access and hosting.

Fashion Elegance Clothing Store:

- Designed and developed a responsive online clothing store website using HTML, SCSS, and React, to showcase skills.
- Integrated interactive elements to elevate the user experience and engage visitors.
- Employed Firebase for efficient database management, ensuring seamless data handling.

Employment History

ICT support Technician

August 2022- Present

Hume Central Secondary College, Melbourne

- Provide Level 1/2 ICT support to staff on the ground and remotely over the phone.
- Provide appropriate systems support, including training and pre-emptive identification and resolution of user's issues with hardware, software, networking, and other technology related problems.
- Prioritising problems, troubleshooting, and exercising problem-solving skills.
- Following-up with clients to ensure resolution is complete and timely manner with regular & effective communication and updates.
- General admin support on a daily basis
- working independently as my IT manager work in the different campus (different school branch)

Personal Attributes

- Strong problem-solving skills: Gained practical experience in troubleshooting and resolving technical issues while working as a helpdesk officer. Effectively identified and resolved user problems related to software, hardware, and network connectivity, ensuring minimal disruption to their work.
- Communication and interpersonal skills: developed while working as an ICT support officer where I communicate with all the students, teacher, principles, and admins effectively, while building rapport with my teams within the IT departments.
- Collaborative team spirit: developed while studying at university where the students were given multiple group assignments and had to work together to achieve a high academic standard. At first it was challenging but as we started working together, I realized that I excel in a team environment. 'Us' is so much powerful than 'I'.
